01 POS Software

Complete System With Full Control
- Scanners, scales, receipt printers, dual display (15 inch cashier touchscreen, 8/11 inch customer display), cash register computer and all other devices with a modern appearance
- Operating system control, break or end of work system control

Displays
- Standard display and digital display when using the scale (PTB 1 and PTB 2 scale license)
- All buttons and actions on the screen are authorization dependent and have a permission structure according to the employee
- Adjusting the combination of sales buttons depending on the needs of the store.

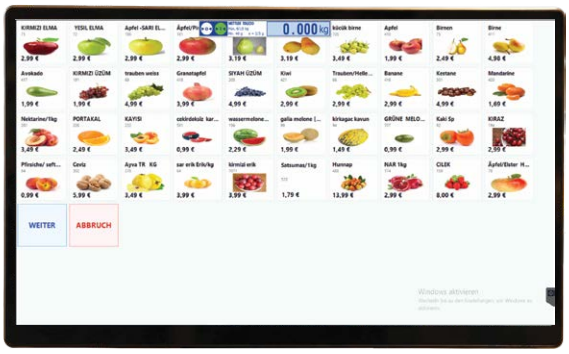

Barcodes
- Using special barcodes created based on weight and price

Fruit & Vegetables Integration
- Selling fruit and vegetables by weight and quantity
- Fruit and vegetable sales screens consisting of product images
- Use of barcodes for fruits and vegetables (coded by weight or number of pieces)

Meat Counter Integration
- Integration of barcodes from the meat counter

Cards
- EC card, credit card transactions via the cash register

Receipts
- Bonpark function
- Receipt cancellation function (by receipt number), cancellation of all receipts, cancellation of a specific position, immediate cancellation of products canceled before the sale was completed.
- Search function in the receipt history and option to reprint receipts

Discounts / Promotion / Points
- Direct discount function, discount as a percentage or quantity for the total amount of the invoice
- Position discount possible
- Easily carry out loyalty card discounts/points, promotions and discount coupon transactions
- Award special prices depending on the customer

Deposits
- Automatic sale and repayment of deposits
- Integration with deposit machines

Vouchers
- Integration of food vouchers in the cash register system (state vouchers)

Pre-Paid Cards
- Direct sales of prepaid cards (phone cards, Nintendo, PlayStation, X-BOX, etc.) from the check-out

ATMs
- Integration with ATMs (Cash Management Systems)

Cash Withdrawal
- Protocol for depositing and withdrawing cash at the cash register

Reports
- All required reports can be printed from the cash register: Z report, X report, employee service report, daily journal, credit and debit card final report, etc.

Legal Requirements Safe
- Digital outputs in accordance with the country's tax laws (data access - GDPdU-DSFinV-K)
- Age and youth protection functions for specific products (energy drinks, alcoholic drinks, all products).
- TSE integration, TSE-Data data export

After-Sale Service & Support
- Instant access to emergency tools
- Integrated support tool (TeamViewer)

1.Product Entry & Control Module **(Integrated with ISS POS Mobile)**

1.1. Product management by product group, supplier, and brand.

- ☑ Advanced warehouse management (listing by product group, supplier, or brand).
- ☑ Direct product entry or entry after invoicing.

1.2. Deposit identification.
1.3. Expiration date control.
1.4. Inventory entry.
1.5. Product history by price and supplier.
1.6. Tracking product orders and stock counts.
1.7. Barcode definition by price or weight.
1.8. Automatic and fast label printing (Integrated with ISS POS Mobile).
1.9. Connection and pricing between product and web store (Shopnow24).
1.10. Product research and list of recently edited products.

2. Wholesale Module

3. Campaign Module

- ☑ Creation of campaigns for a specific period (automatic activation).
- ☑ List of past campaigns.

4. Supplier Module

- ☑ Definition and management of suppliers.

5. Brand Management Module

6. Deposit Management Module

7. Product Group Module

- ☑ Definition and management of product groups.

8. Prepaid Card Management Module

9. Meat Scale Management Module

- ☑ (Bizerba, Mettler-Toledo, DIGI)

10. Label Control Module

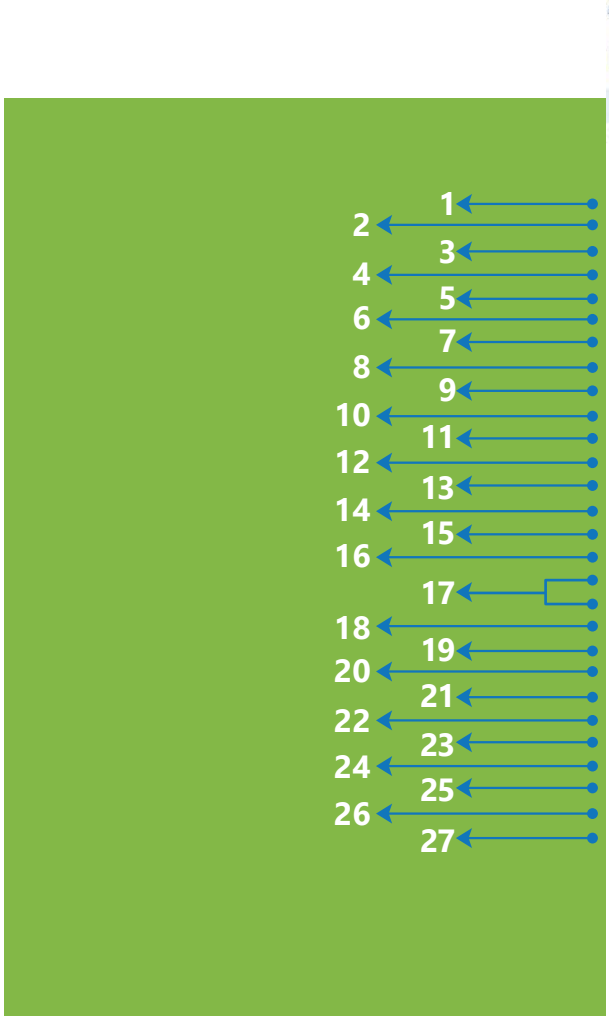

11. Data Transfer, Import/Export Module

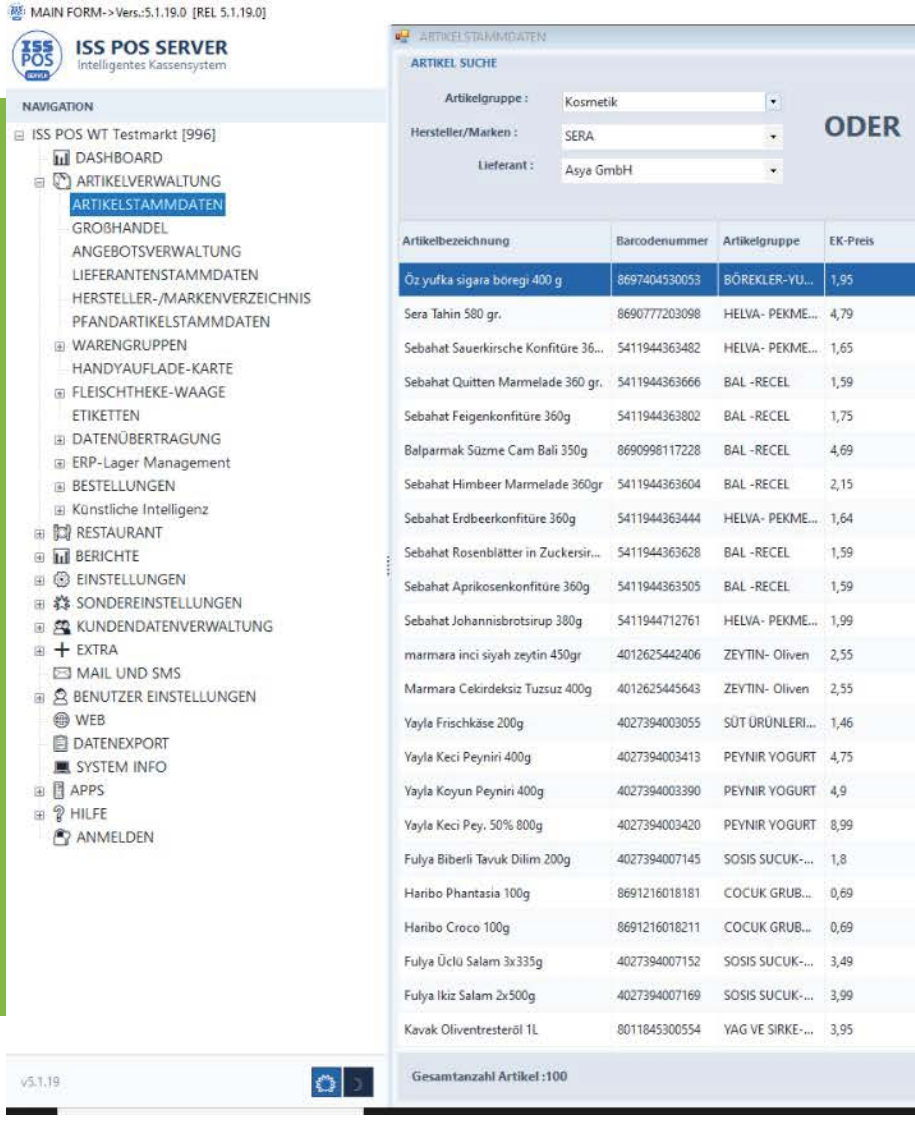

12. ERP Warehouse Management Module

13. In-Store Ordering Module

- ☑ (Integrated with ISS POS Mobile)

14. Artificial Intelligence (AI) Module

15. Restaurant Module
- A complete table management system for restaurants and food courts.

16. Reporting Module
- Real-time cash and transaction reporting (Z-Report).
- X-Report

16.1. Status Reports
- Tracking Report for Changed Product Information (Change Log).
- Expiration date tracking report.
- Material inventory report.
- Product inventory report.
- Minimum Stock List Inventory Control Report.
- Stock status report.
- Valuation and inventory report for products in-store.

16.2. Statistics Module
- Sales statistics (hourly, monthly, daily, or date-based).
- Customer card sales report.
- Receipt statistics and evaluation.

17. Settings Module
- POS register settings and Office ERP settings

18. Customer Management
- Customer list.
- Definition of customers and customer groups.

18.1. Settings for points, discounts, and discount coupons.

19. Extras

20. Mail and SMS Module

21. System User Module
- Cashier/User Definition.
- Cashier/User permission settings.

22. Access to ISS POS System Website

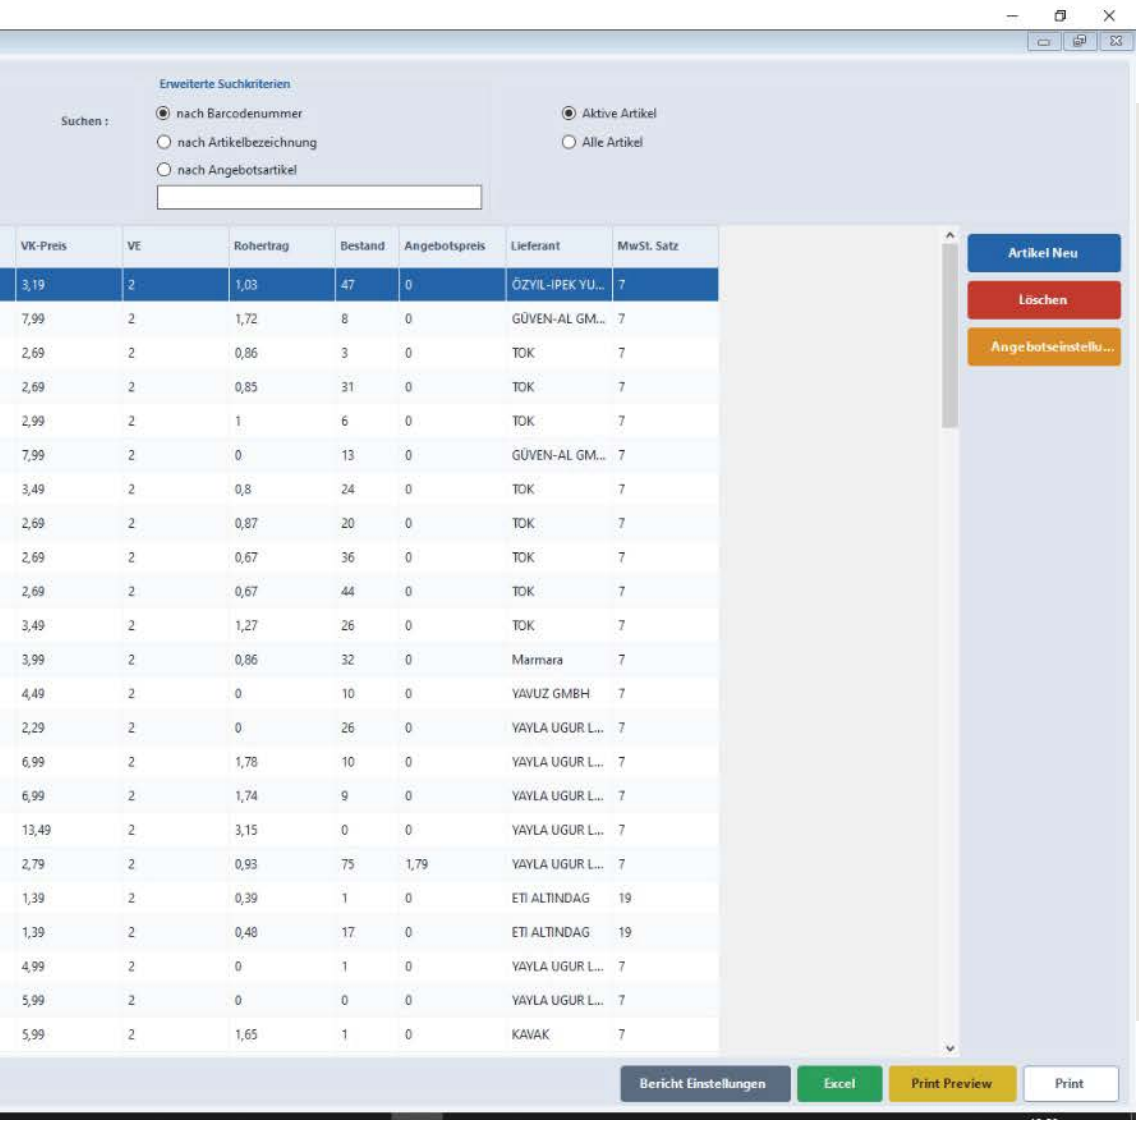

23. Data Export Module for Tax Office

24. Show System Information

25. Mobile Applications
- ISS-POS Mobile, ISS-POS Go, e-Bon, Shopnow24

26. Help
- Remote Connection - TeamViewer, TSE Documents

27. User Login Module

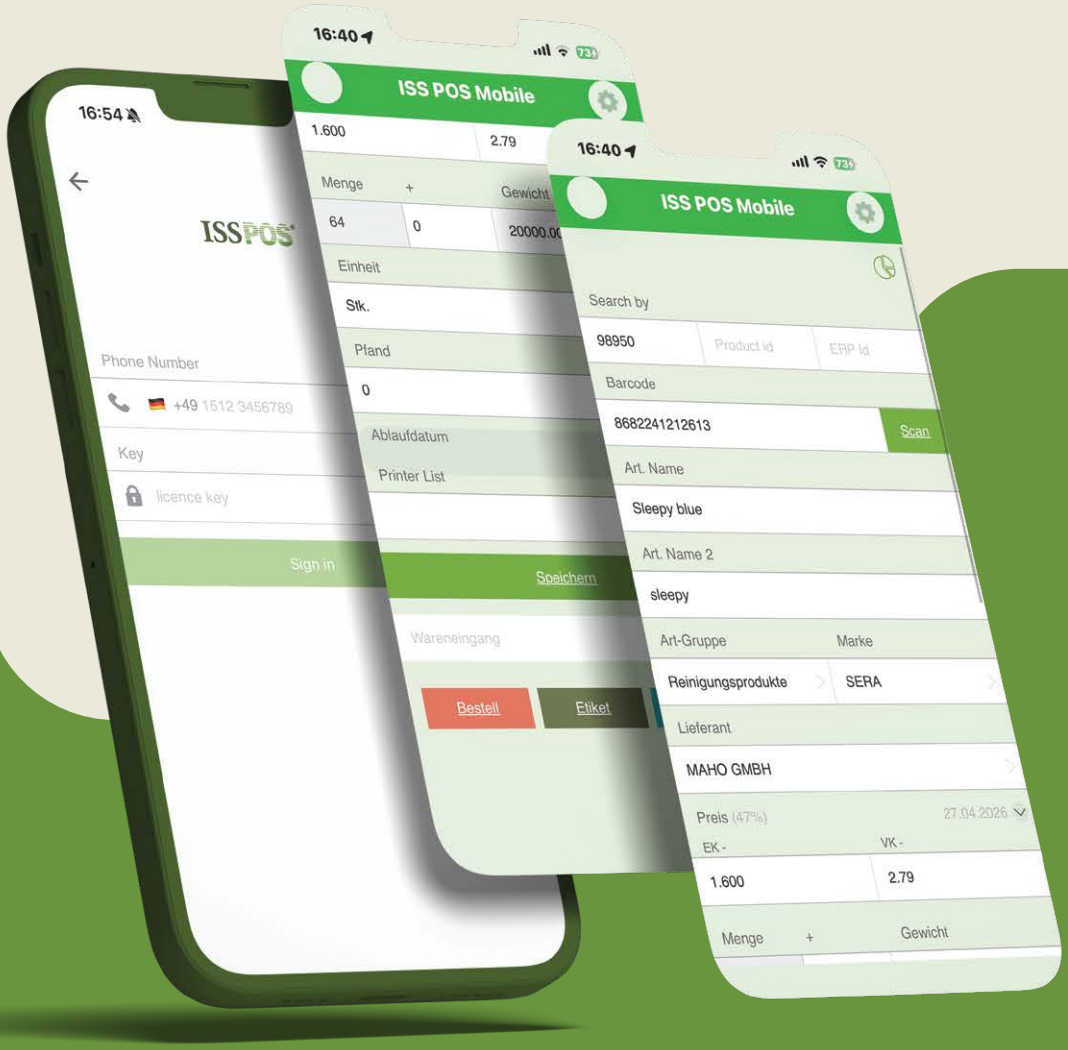

Server Software - Modern Interface Design

Manage your business from your location with the ISS POS Mobile application

The ISS POS Mobile App allows you to carry out all business processes related to your products directly from your mobile phone, both inside and outside your company. Use your mobile phone camera as a scanner to carry out all kinds of transactions related to your products in the easiest way possible without physically moving the products!

- View all types of information about your products (Name, Barcode, Middle Name, Brand, Supplier, Group Names, Buying and Selling Price, Stock Level, etc.).
- Inventory or goods receipt mode
- Creation of label lists or optional direct label printing
- Creation of in-store order lists
- Creation of lists for products that have passed their expiry date
- Price comparison with the supplier product code before placing the product on your shelf
- Batch control and product expiry date warning (New)
- View the last changed price of a product (New)
- External access to created order lists (e.g. from the wholesale market) and direct updating of products (new)
- Electronic label mode (ESL to associate your products with digital labels (New)

Download on the App Store

GET IN ON Google Play

Wherever you are, you stay in control of your POS system and your store. With this application you have control at all times over the following services:

- Total turnover of the company, total number of receipts issued, distribution of turnover by groups,
- Access and control over the past sales of the cash register system,
- Cash, card payments and cancellations per cash register, cash register opening time, information about which employee sitting at the checkout at this point,
- Distribution of sales per checkout by product group,
- Remote-controlled creation of the end-of-day report (Z-report),
- If you have multiple branches, you can see all of them in a single application.

GET IN ON Google Play

Download on the App Store

The e-Bon mobile application helps your business keep up with the digital era while providing you with many benefits. The e-Bon digital platform has the following functions:

- **Digital receipt sending:** Sends the receipt digitally to your customer's mobile phone without receiving any personal information from them. Go paperless and fully digital while letting your customers save the environment and reduce carbon footprint.
- **e-Bon Digital Loyalty Card:** Frees the company from the burden of physical customer cards (customer loyalty cards) and offers your customers a digital customer experience.
- **Various payment methods:** e-Bon allows the use of all modern payment systems worldwide (Paypal, ApplePay, Google-Pay, Klarna, WeChat, etc.) regardless of traditional cash or card payment methods and without the need for a special device.

ISS POS® DIGITAL SHELF LABEL (ESL) INTEGRATION

Efficiency and Speed

- **Zero Margin of Error in Price Updates:** Update labels across your entire store in seconds with a single click from your ISS POS system.
- **Lower Operational Costs:** Increase staff efficiency by eliminating the manual hassle of printing, cutting, and placing paper labels.

Customer Experience and Technology

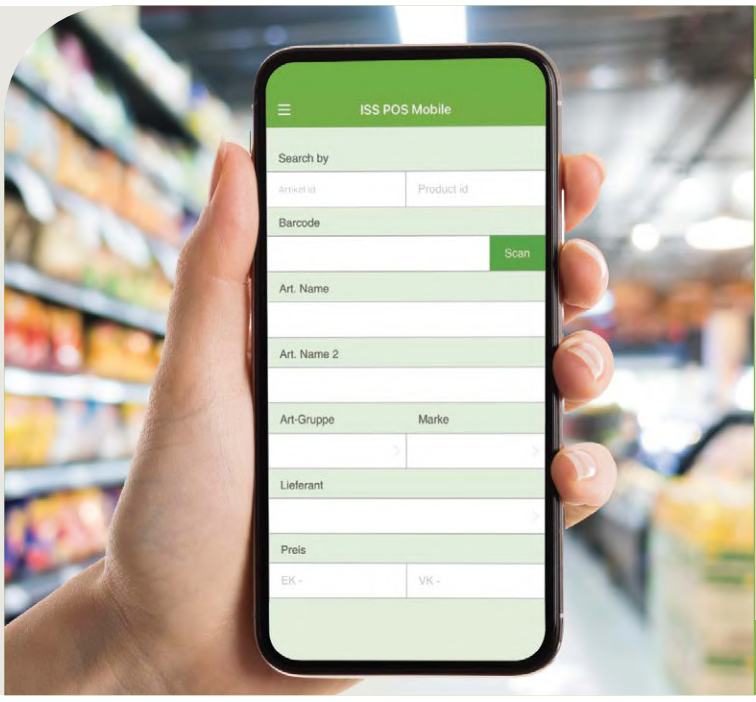

- **Always Current, Always Accurate**: Maximize customer trust by eliminating price discrepancies between the checkout and the shelf.
- **Dynamic Pricing Advantage:** Effortlessly manage instant campaigns and discounts based on specific times of the day or stock levels.
- **Modern Look**: Merge your store's aesthetics with digital elegance; achieve a professional appearance across all product lines.

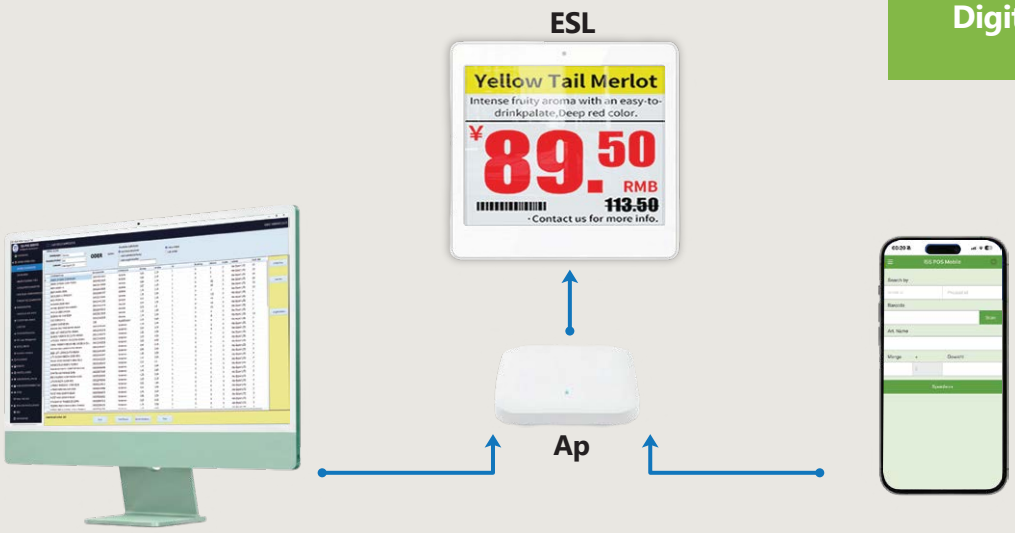

Not just a label, but the digital intelligence of your store.

ISS POS Mobile App

Integrates seamlessly with Digital Shelf Labels (ESL). This means you can automatically update both your product prices and your shelf labels from anywhere using the ISS POS Mobile App, without the need for any additional software.

ISS POS-Scale-Integration offers an optimized and future-oriented product range that is suitable for the retail trade

The innovative Meat Counter Scale Integration enables smooth communication between the OFFICE systems (ISS POS WaWi) and the meat counter scales (Bizerba, Mettler-Toledo, DIGI). Individual or block sale content is automatically transferred.

The three-way constellation between the cash register terminal (ISS POS), the meat counter scale (Bizerba, Mettler-Toledo, DIGI) and the OFFICE (ISS POS WaWi) makes it possible to keep all relevant information under control.

With the ISS POS Server software you can ...

- Easily track your butcher inventory
- Create a single receipt when purchasing meat
- Save your staff time
- See how much time your customers spend in your market
- Avoid error rates and product leaks

AI-Powered Smart Meat Scale

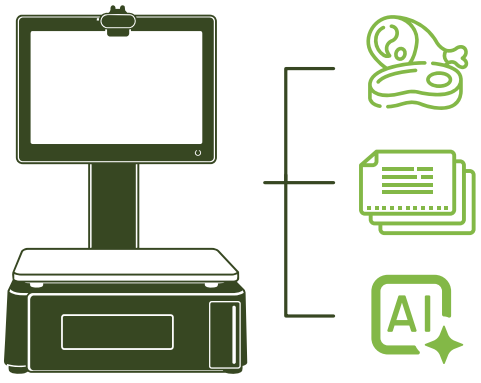

Weighing, Product Recognition and Labeling in One System

The CAS CL series meat scale is reconfigured with the ISS POS infrastructure and transformed into a smart weighing solution tailored to your business.

Thanks to the integrated camera system and AI-powered product recognition technology added to the device, products are detected quickly and accurately, making weighing, pricing and labeling processes more practical.

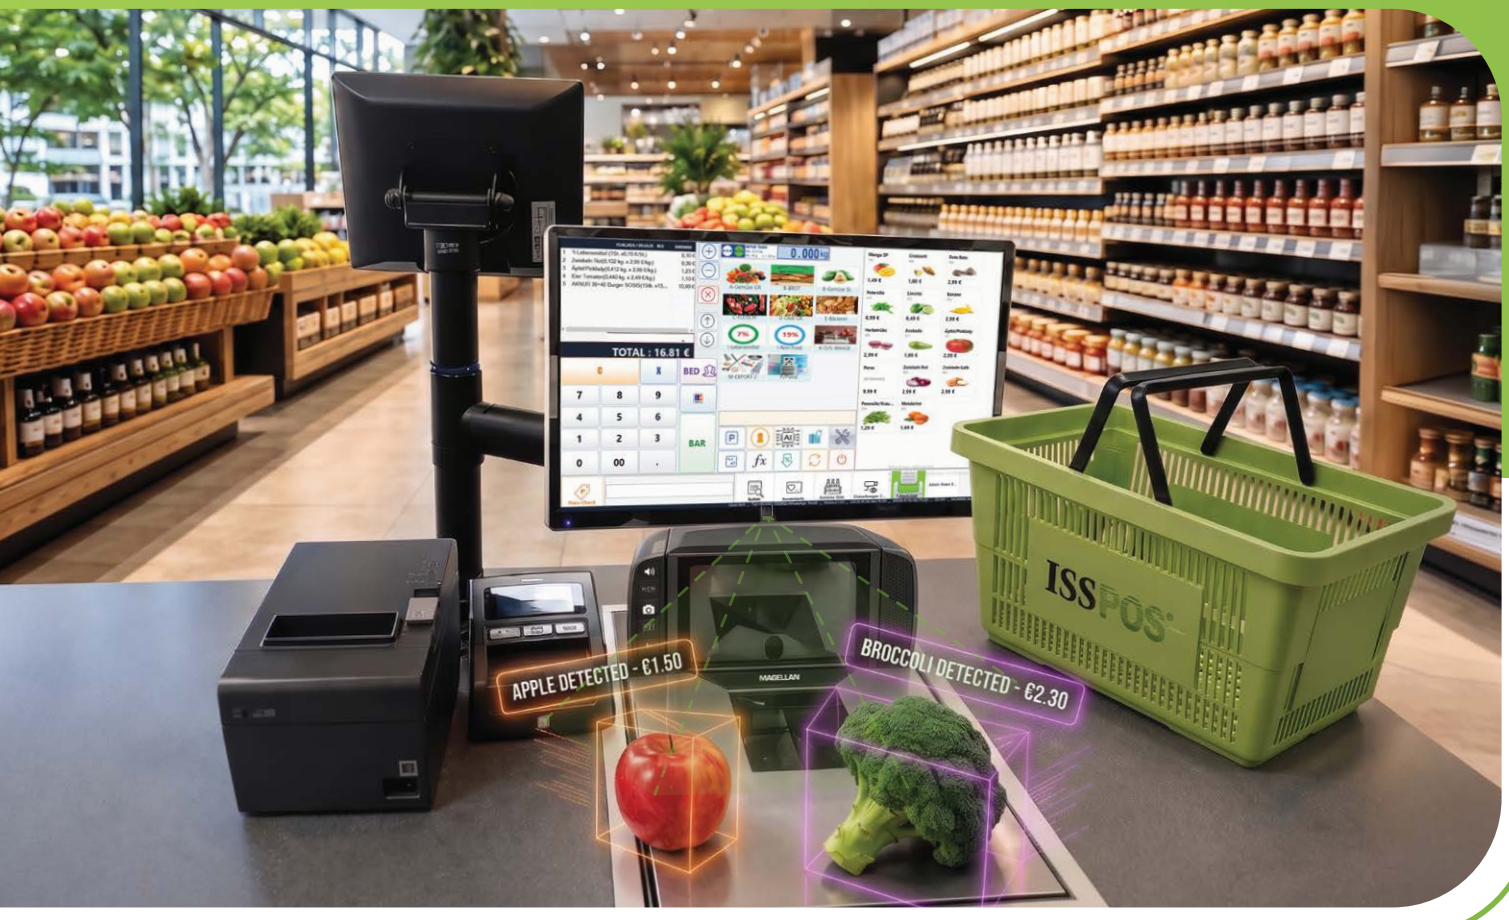

Fully compatible with ISS POS software, this system provides centralized management of product information, prices, barcodes, and stock processes.

AI-Powered Cart Tracking

- Secure your sales and protect your business and profits with ISS POS's intelligent basket tracking feature.
- A high-precision camera monitors the shopping basket area in real-time, using Artificial Intelligence to help you protect your business and minimize losses without slowing down the checkout process.

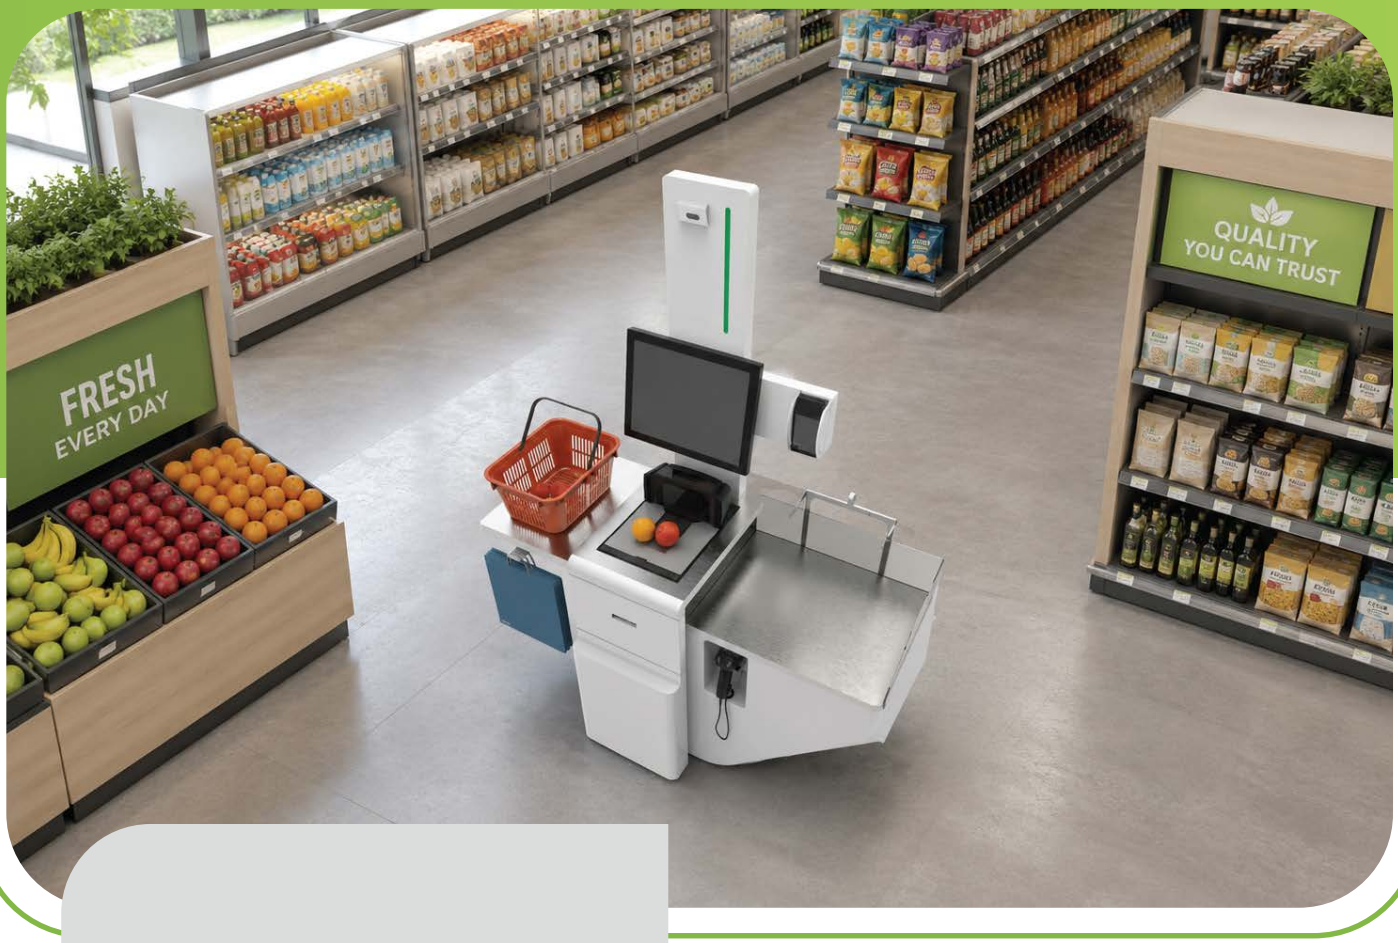

Key Advantages:

- Detects items left forgotten inside the shopping basket automatically.
- Prevents intentional misuse, unscanned merchandise, and theft at the POS.
- Reduces inventory shrinkage while speeding up transaction throughput.
- Enhances store security seamlessly without requiring extra staff intervention.

Let Artificial Intelligence keep watch, while you focus on serving your customers.

Product Recognition with Artificial Intelligence (AI)

Carry your store into the future with ISS POS. As soon as an item is placed on the scale, our advanced AI vision system instantly identifies the product, ensuring accurate pricing every single time.

Key Advantages:

- Eliminates the need for manual PLU number lookups and search menus.
- Particularly effective for fresh produce, bulk items, and non-barcoded goods.
- Drastically reduces checkout waiting times and cashier friction.
- Minimizes human input errors to guarantee correct margins on weighted items.

Be smarter and more efficient with AI-powered ISS POS.

Automated Invoice, Document Scanning and Language Support

- Eliminate manual data entry and streamline your operations with ISS POS's automated invoice and document scanning feature.
- Our integrated Artificial Intelligence technology instantly extracts critical data from physical delivery notes, paper invoices, and receipts, mapping them directly into your inventory management system.

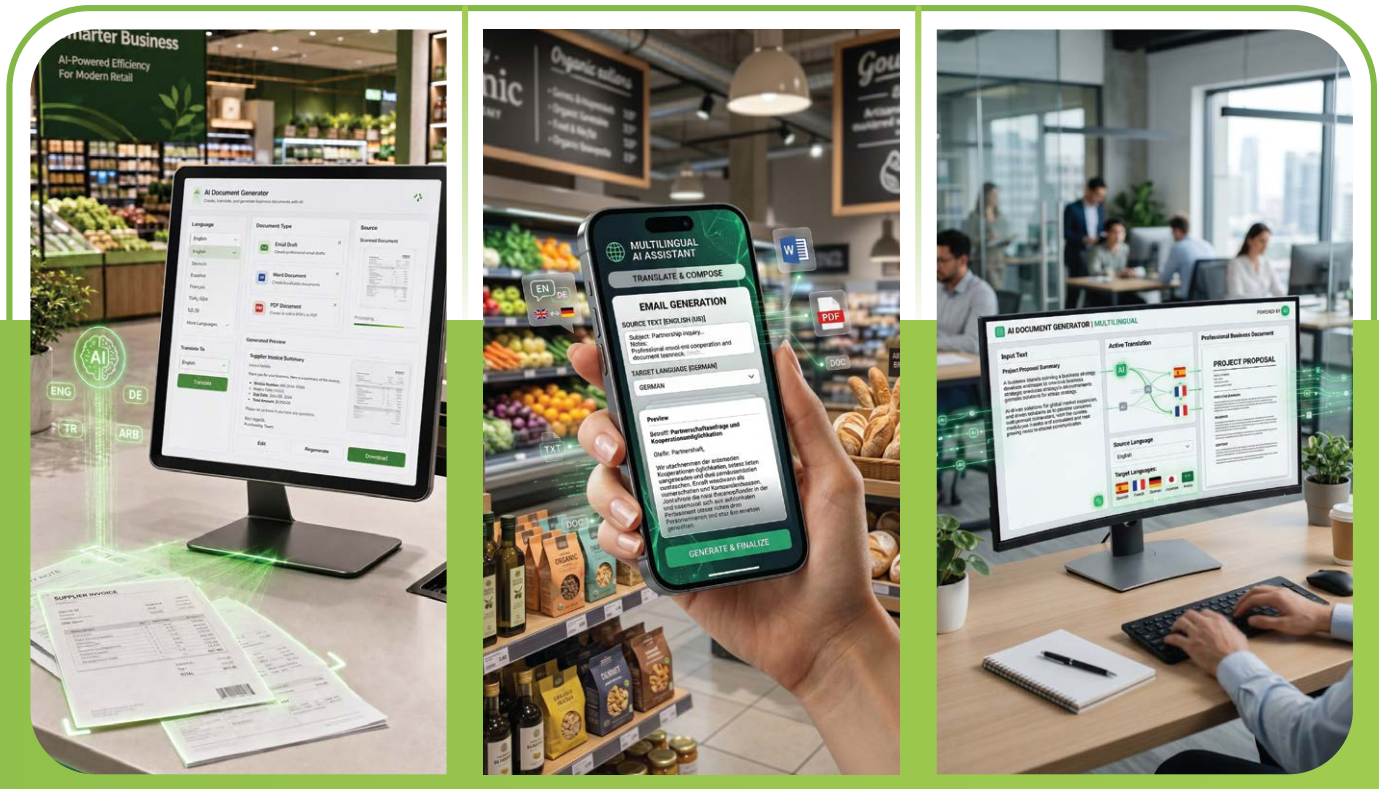

Key Advantages:

- Instantly digitizes paper documents using advanced OCR data extraction.
- Eliminates tedious manual typing, reducing back-office labor costs.
- Keeps your accounting ledger and live inventory quantities perfectly up to date.
- Cross-references incoming delivery notes with supplier orders to flag price discrepancies.

Experience a seamless, automated document management ecosystem with AI support.

Automated Language Support:
Write Documents in Any Language with AI-Powered Document Generator.

Effortlessly create all types of business correspondence such as MS Word or PDF documents, emails, etc.

Key Advantages:

- Creates business-ready text templates and documents quickly and accurately.
- Eliminates translation errors, grammar mistakes, and awkward phrasing.
- Guarantees a consistent, polished, and professional corporate tone across languages.
- Enables smooth communication with international wholesalers and diverse store teams.

Benefit from the global advantages of AI-powered ISS multi-language support.

SoftPOS

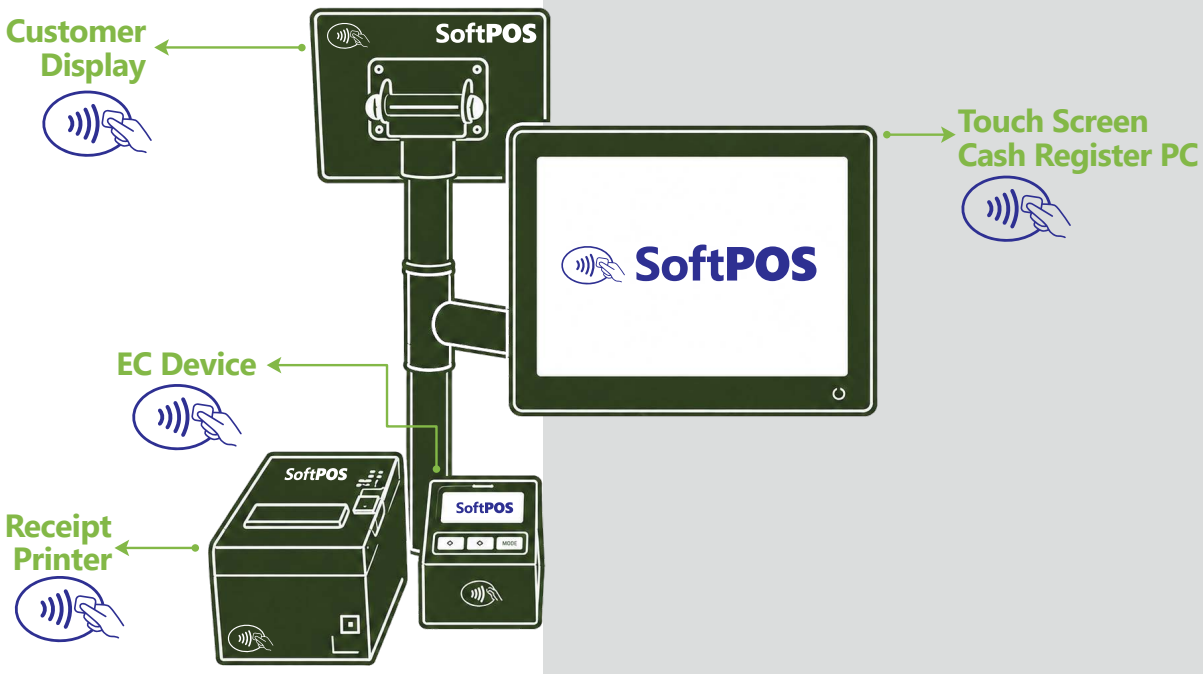

Contactless payment is now everywhere

Thanks to SoftPOS technology, businesses can accept payments via a smartphone or tablet without the need for an additional POS device. Contactless card, mobile wallet and digital payment transactions can be completed quickly, securely and conveniently.

Integrated with the ISS POS infrastructure, the SoftPOS solution offers a flexible, cost-effective and modern payment experience for field sales, restaurants, supermarkets, delivery teams and mobile businesses.

With the Tap to Pay feature, customers can make fast and secure payments within seconds by simply holding their card, phone or smartwatch near the payment device. With its fast transaction time, secure payment infrastructure and ease of use, it reduces checkout congestion and increases customer satisfaction.

ISS POS Cash Register Systems is an official DATEV software partner

ISS POS is a solution partner of DATEV. With the common SWISS-BIT and DATEV platform that you can create, your data (TSE data and others) are transferred online to DATEV every day when you print the End of Day report (Z report). If your tax advisor has a DATEV advisor number, all necessary data will be automatically transferred to him. In this case, the 10-year backup of the data locally would no longer be necessary.

ISS POS® Cloud

A New Era of Flexibility

Until now, ISS POS was known for its high stability and reliability within your local network. Now, we are taking it a step further by offering supermarkets and retail businesses complete freedom of choice: continue using your ISS POS system on your local network (Local) as usual, or transition to our new cloud-based infrastructure.

Key Advantages of the New ISS POS Cloud

- **Location-Independent Access**
- **Centralized Multi-Store Management**
- **High Data Security & Automatic Backups**
- **Effortless Updates**
- **Performance & AI Analytics Dashboard**
- **Product, Stock & Supply Management**

The Choice is Yours:

Local: Proven high performance and complete control within your local network.

Local + Cloud: Maximum flexibility, centralized management, and location-independent access.

Seamless Integration with Cash Management Systems

Advantages of Cash Machines

- Instant currency exchange
- Automated cash transactions with bank-grade security.
- High-speed banknote and coin validation.
- High storage capacity.
- Full integration with ISS POS.
- Robust anti-fraud technology and reinforced steel body.
- Hygienic, zero risk of infection.
- Reduces manual processing errors.
- Real-time cash flow monitoring and digital auditing.
- Intelligent denomination recycling for optimal change payout.

- Enhances cashier productivity by focusing on customer service.
- Multi-megapixel optical sensors for counterfeit detection.
- Jam-free note path engineering for uncompromised uptime.
- Standalone emergency power override during blackout events.
- Advanced mechanical separating units for foreign object rejection.
- Intuitive LED user guiding lights for easy payment.
- Accepts mixed cash deposits simultaneously for faster checkout.
- Silent, ultra-quiet mechanical operation behind the counter.

Modernize your business with Self-Checkout and Self-Order kiosks

Self-Checkout Kiosk for food and non-food markets:

- Offer your customers a quick, easy and convenient way to do their shopping independently.
- The self-checkout systems from ISS POS can be easily integrated into existing cash register systems - without much effort or high costs.

Self-Order Kiosk for catering, non-food areas or quick-service restaurants:

- With our self-ordering kiosks, your customers can place orders independently while you benefit from optimized processes.

Your advantages with ISS POS:

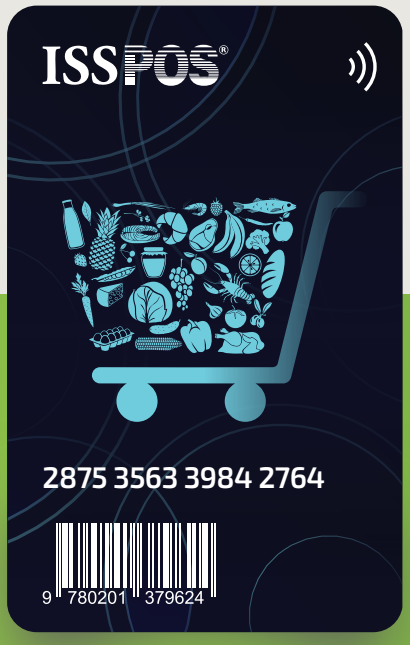

- Easy integration: Fast implementation without expensive hardware investments.
- State-of-the-art technology: Support from ISS POS software and AI for smooth processes.
- Time and cost savings: more efficient processes and higher customer satisfaction.

Transform your business into a modern success story - with the innovative solutions from ISS POS!

With the ISS POS systems you can set up customer loyalty programs to the extent and in the way you want, and according to your own preferences.

POINTS or DISCOUNT

In the system, you can normally create uniform rates or separate rates depending on the customer or customer group, or individual rates for each customer.

INDIVIDUAL PRICING

In addition to the normal sales price of a product, if necessary, you can set a special price for a customer group or an individual price for a customer.

DISCOUNT COUPON

To strengthen customer loyalty, you can offer discount coupons in your system. The system automatically creates these below the sales receipt and automatically grants discounts on future purchases.

ISS POS cash register systems offer the function of reloadable telephone cards (prepaid cards), voucher cards etc., that are integrated into the innovative cash register system, especially in supermarkets and kiosks. You can select and sell the product desired by the customer directly from your checkout screen, without using additional printing software or a PC. The activation code appears on the receipt that the customer will receive after the purchase process. Enjoy fulfilling one more request from your customers with a much higher profit margin than your competitors.

YOU CAN INTEGRATE MANY OTHER CARD SYSTEMS

- All prepaid cell phone top-up cards
- Amazon(TM) Gift Cards
- XBOX, Nintendo, PlayStation Gift Cards
- iTunes, GooglePlay Cards
- Netflix Gift Cards

OPTIMIERTE KASSENSYSTEME

Wir bescheinigen der Firma Windsoft Tech GmbH, dass die geprüfte digitale Schnittstelle für den Datenexport von Kassendaten den Vorgaben der DSFinV-K zur Datenstruktur (Ziff. 3 der DSFinV-K) entspricht und die bereitgestellten Daten in die Prüfsoftware der Finanzverwaltung importiert werden können.

Diese Bescheinigung bezieht sich auf

- das Kassensystem ISS POS Kassensysteme mit der Versionsnummer 1.1.48
- den Datenexport von 19.05.2022
- die DSFinV-K in der Version 2.3. vom 04.03.2022

Ergebnis der Validierung

Level 1: Technische Validierung — Bestanden

Anforderungen:
1. Steuerrelevante Daten (csv-Dateien)
2. Beschreibungsdatei (index.xml)
3. Technische Spezifikationsdatei (dtd-Datei)
4. Korrekte Syntax der index.xml für den automatisierten Import in die Prüfsoftware IDEA

Level 2: Strukturelle Validierung — Bestanden

- Datenfelder des Datenexports entsprechen den strukturellen Vorgaben der DSFinV-K

Durch die Validierung wurde der Nachweis erbracht, dass die geprüfte Datenlieferung über die digitale Datenschnittstelle den Vorgaben der Finanzverwaltung zur Datenstruktur von Kassendaten (DSFinV-K) entspricht. Dieses Zertifikat hat eine Gültigkeit bis 31.12.2023.

Düsseldorf, den 23.05.2022

Andreas Arntz
Audicon GmbH
Leiter Datenanalyse-Consulting

ISS POS: Empower Your Business with Seamless API Integration

The ISS POS API package provides developers and corporate business partners with the robust tools needed to integrate our powerful Point of Sale (POS) capabilities directly into third-party applications, custom ERP systems, and specialized workflows.

Our API is designed for full bi-directional integration (from us to 3rd party and from 3rd party to us) to ensure speed and reliability. It is organized into logical modules covering every aspect of modern retail and service sector management:

- **User and Security**
- **Company and Branch Information**
- **Order Management**
- **System Alerts and Configuration**

ISS POS API; flexible, scalable, efficient.

ISS POS: After-Sales Support Service

A - Maintenance Agreement

ISS POS Cash Register Systems aims to provide its customers with the fastest and most efficient customer support possible, at high quality and favorable terms, by signing a maintenance agreement at the most critical strategic point of your company. The purpose of this agreement is to ensure that our customers can maintain seamless operations through a cash register system that is always functional and, above all, permanently secure. This allows us to provide you with a continuous, supportive service at fixed and low costs. Our maintenance agreement includes a complete service package and, among other things, includes remote maintenance, teletext support, remote connection support, and on-site support to ensure your POS system runs smoothly after the initial installation. Of course, this agreement is not mandatory for you, but based on our experience, we strictly recommend it in terms of efficiency and cost-effectiveness. If you do not wish to enter into a maintenance agreement, you can request alternative support as explained in more detail below.

B - Phone Support

ISS POS offers modern remote telephone support to all its customers. This is independent of signing a maintenance agreement but differs in terms of cost structure. In cooperation with the company TENIOS, we have developed a practical communication software based on special customer requirements. Due to the interactive development with the software company, this innovative communication method is exclusively owned by ISS POS Cash Register Systems. The system, which focuses on very specific technical problem-solving strategies through dialogue, can directly detect the workflow of the caller and the person seeking help, and record all communication parameters down to the second. If desired, the caller can follow the data record of the conversation online via the www.iss-pos.de website.

C- Field Support Partner

ISS POS Cash Register Systems works with various local service partners across the country regarding sales and technical customer service, and you can request fast and simple support when needed. You can get information about the local partner company responsible for your business through a personal meeting with us.

If you have any questions regarding your cash register system, please call the following number:

ISS POS: Comprehensive POS Consulting

Strategic Financing Solutions for Your POS Systems

Significant investments require careful financial planning. In cooperation with our trusted sales partners such as ABC Finance for your new POS systems, we guide you on solutions such as leasing or installment purchases. In this way, we help you modernize your business without creating obstacles to your liquidity and without compromising your financial flexibility, allowing you to use the most efficient systems.

Core Infrastructure: Hardware and Software Guidance

Do you want to run your market smoothly but want to know what the most appropriate hardware and software required is? We help you identify and implement the right components, from touchscreen cash register computers to customer displays, high-performance scanners to receipt printers, and integrated payment terminals.

Seamless Integration with German Legal Authorities

- Eichamt (Weights and Measures Office) Compliance: We offer expert guidance and ensure your measuring devices comply with the strict calibration standards set by the Eichamt. Our systems hold the necessary PTB calibration office certificates, guaranteeing accuracy and legal compliance for weighted goods.
- Finanzamt (Tax Office) Compliance: By assisting in the correct installation and integration of TSE (Technical Security Device) modules, we ensure that all transaction data is recorded in accordance with tax laws and security standards. Additionally, ISS POS is an official DATEV software partner and ensures that your financial data (including Z-reports and other relevant information) is transferred directly to your tax advisor via DATEV in an automated and secure manner. This complies with data access regulations such as GDPdU-DSFinV-K and generally eliminates the need for local 10-year data backups.
